Recommended Host Configuration

Performance results are highly dependent upon the individual host hardware, applications being used, OS and network conditions.

Application Scenario	5-10 users	11-20 user
Productivity applications	CPU: i3	CPU: i5
	Memory: 8 GB	Memory: 16 GB
Mixed productivity plus some video	CPU: i5	CPU: i7
	Memory: 8 GB	Memory: 16 GB
Media intensive productivity plus frequent video	CPU: i5	CPU: i7
	Memory: 8 GB	Memory: 16 GB

   *   Recommended Storage using HDDs in RAID, or SSD for System &program files and HDD for user data; Stroage size to be determined by actual needs.
 * *Video Testing was performed using 480p video at 1366*768 resolution in Windows 7.
* * *These recommendations are preliminary and represent a guideline only. Actual sizing requirements depend on particular workload. Always validate sizing using your own applications.
